

## 9.1.2 Temperature reference table (-°C)

## 9.1.2 Temperaturtabelle (-°C)

Tissue type	Chamber temperature	Specimen head temperature
<b>Spleen</b>	-15°C to -20°C	-11°C
<b>Liver</b>	-10°C -15°C	-20°C off to -15°C
<b>Intestine</b>	-10°C -15°C	-20°C A*: off to -20°C E*: -20°C
<b>Heart</b>	-10°C -15°C	A: -20°C E: -20°C to -30°C off to -20°C
<b>Ovaries</b>	-10°C -15°C	E: -20°C off to -15°C
<b>Fallopian tubes</b>	-10° -15°C	E: -20°C off to -15°C
<b>Kidney</b>	-10°C -15°C -20°C	-20°C A: off to -15°C -20°C
<b>Muscle</b>	-18°C to -20°C	-15°C
<b>Skin with fat</b>	-19°C	-32°C to -40°C
<b>Hard fat</b>	-19°C	-21°C to -25°C
<b>Stomach</b>	-10°C -15°C	-20°C off to -15°C
<b>Brain</b>	-15°C	-10°C, embedded *E

**\*A = blocked, \*E = complete**

The temperature values given above are based on long-term experience, however, these are only approximate values, as any tissue may require particular adjustments.
